

- Smooth travel and lift combine with excellent controls to reduce product damage and increase productivity
- Lift limit switch operates at maximum lift height to shut off pump motor
- A heavy-duty 24-volt fused electrical system provides good travel and lift speeds
- High quality hydraulic pump assure very low noise, maximum efficiency and durability
- Drive units is equipped with an electromagnetic brake that is spring applied and electrically release. Brake is activated by the control handle position. Ergonomic designed control handle with buttons for raising, lowering and horning
- Automatic reduction of speed when driving with the fork height more than 300 mm
- Lesser turning radius suitable for narrow passage
- With CURTIS electronic control from Europe
- Reduce fatigue with platform
- Built-in-charger
- Equipped with CURTIS electronic controller and METALROTA drive unit
- CE Certified and Conforms to EN 1726-1 and EN 1175-1
